## SUMMARY

I bring over 10 years of industry experience to the table and has worked with major tech companies like Yelp, Thumbtack, Airtable, and Namecheap.

I am an expert in bridging the gap between design and engineering and helping teams establish a design language that results in quality end-user experiences.

I am competent across the full stack web/mobile stack.

I value communication and trust most when working with remote teams.

## WORK EXPERIENCE

### Front-end Software Engineer

Yelp Jun 2015 - Feb 2017

- Worked closely with the product team to build new features for the desktop and mobile site.
- Had a lead role on the small team that produced Yelp's first UI style guide, and then made it available to the public. The style guide precipitated an organization-wide push towards modular design.
- Rebuilt completely Yelp's most important page (the business page) from scratch, using advanced CSS features for layout and interaction.
- Led the development of a complete overhaul of all email templates, including Yelp Weekly, which is sent to millions of users per week.
- Gained unique experience working on a large-scale software project with hundreds of contributors. Learned extensively about release engineering, including testing and deployment, as well as common web security vulnerabilities.
