RYUJI KANEKO

Python Developer | Full Stack Web Developer

@ Email: sweetbigdream428@gmail.com   🔗 Github: manager428   📍 Address: Kobe, Japan

SUMMARY

As a software developer with 7 years of experience, have been collaborating with a variety of companies including small startups and big communities, which has made me intimately familiar with all the stages of the web lifecy- cle from the initial architecture to final deployment.
Interested in devising a better problem-solving method for challenging tasks, and learning new technologies and tools if the need arises.
I am competent across the full stack web development, and I am not new to remote work, so my working hours are very flexible.
Also, Over the past two years, I have accumulated a lot of knowledge about data engineering by working on several projects based on data science, such as data integration and data analysis.

EDUCATION

Bachelor of Computer Science

Kobe University   📅 04/2011 - 09/2015   📍 Kobe

GPA
3.8 / 4.0

EXPERIENCE

Python Developer

KAIZEN PLATFORM   📅 08/2022 - 07/2023

- Made over 600 insertions and 100 deletions to 4 central Firmware repositories in less than 3 months
- Participated in more than 3 projects from initial research and conceptual design through testing and implementation phases
- Developed data quality portal using Python scripting, increasing data quality by 30%
- Communicated and coordinated with the project manager and coworkers to resolve 30+ build breaks a month

Data Engineer

Argosgrafix   📅 09/2021 - 07/2022

- Streamlined the software's codebase, improving performance and maintainability.
- Visualised over 40 datasets with Matplotlib
- Utilized Python libraries, like NumPy and Pandas, for complex data analysis and modeling.
- Delivering projects with 1-2 days turn around time or even within hours

Frontend Developer

THE LLOYD GROUP INC.   📅 06/2020 - 08/2021

Hottolink is a Technology company that specializes in Big Data and analytics solutions.

- Redesigned and rebuilt 3 websites, driving remarkable growth for over 2 startups.
- Converted 2 traditional web apps to single-page apps with AJAX and state management techniques in JavaScript.
- Created 4 compelling and interactive charts and animations using Recharts, Highcharts, CSS, and JavaScript.
- roubleshot and resolved over 20 front-end rendering performance issues and computationally intensive bot- tlenecks using Chrome DevTools.

SKILLS

Languages

JavaScript   TypeScript   ECMAScript

HTML5/CSS 3   SCSS/SASS   GraphQL

Python   Ruby   C++

Frameworks & Libraries

jQuery   React   React Native

Three.js   D3.js   Angular   Next

Vue   BootStrap   Tailwind CSS

Node.js   Nest.js   Django   Flask

Ruby on Rails   Data Engineering

Data Analysis & Visualization

Unit Testing

Database/Storage/Platforms

MongoDB   MySQL   PostgreSQL

Firebase   Google Cloud Storage   AWS

GCP

Tools

Git   GitHub   GitLab   Bitbucket

Jira   Postman   REST Console

Swagger   Slack   Docker

WebPack

EXPERIENCE

Front-end Engineer
CORETELLIGENT   📅 05/2018 - 04/2020

·   Collaborated with a client and 4 cross-functional teams to plan, develop, test, and deploy high-quality software solutions.
·   Designed an application architecture that became the company standard for optimal performance and scala- bility using React, TypeScript, Jest.
·   Directed over 10 features and user interfaces to optimize performance of user-facing products, and mentored 2 front-end developers for maintainable and high-quality code.
·   Led code reviews for 2 front-end developers to ensure code quality and maintainability.
·   Optimized Webpack build process for an 80% reduction in build times and bundle sizes, resulting in faster de- ployment and 75% improved performance.
·   Constructed 2 admin and client dashboards with complex data visualization and user-friendly search features using React.
·   Conducted technical workshops for 5 colleagues on topics such as Regular Expressions and Redux.
·   Advised as a trusted technology advisor to 2 designers, ensuring alignment with business goals and objectives.

Software Development Engineer - Intern
Amazon   📅 02/2018 - 05/2018

·   Streamlined 1 website using JavaScript, HTML5/CSS3, and commercial/open-source tools from wireframes and visual designs.
·   Translated Figma designs into responsive web pages with animations using HTML5/CSS3 and web-based ani- mation tools.
·   Conducted extensive testing across multiple browsers and devices to ensure optimal performance and com- patibility.
·   Utilized rapid prototyping techniques to quickly test and refine new ideas, improving concept quality.

Freelance Full-stack developer
Freelancer   📅 10/2015 - 12/2017

·   Developed 2 MERN and MEAN stack applications using agile methodologies.
·   Built 5 custom websites with HTML5/CSS3, JavaScript, and Laravel/PHP API endpoints.
·   Created 1 front-end widget as a single external script using vanilla JavaScript.
·   Managed the entire product development lifecycle and solved 2 payment integration challenges with high pre- cision for various user banks.
·   Proficient with various web development tools, including Git and Cloud Services such as AWS, Azure, GCP, Heroku, and Netlify.

STRENGTHS

🕐 Time management
Prioritizes essential tasks so they are not rushed. Sets deadlines that ensure reaching milestones on time.

⚙ Adaptability
I remember that change is not personal and is inevitable. I break my projects into multiple parts so that if something goes wrong, I can quickly fix it.

Accountability
I take ownership of my mistakes. By doing that I learn what I did wrong so that it does not happen again.
